EDUCATION

- **PES University** Bangalore, India
Bachelor of Technology in Computer Science(AI-ML) Nov. 2022 – Present

SKILLS

Languages: Python, C, Javascript, Bash

Libraries/Frameworks: OpenCV, Tensorflow

Tools: Docker, Git, Unity, Flask, Linux, AWS

EXPERIENCE

- **Appex PESU** PES University, Bangalore
Open Source Contributor June 2024 - July 2024
 - **Pytorch and Transformers :**
 - Applied the MAML Few Shot Learning framework on the Food 101 Dataset.
 - Achieved an accuracy of 33.81% indicating the potential of meta-learning for image classification.
- **Appex PESU** PES University, Bangalore
Logistics Head Jan 2024 - Present
 - **App Genesis:**
 - Organized and led an 8-hour ideathon called App Genesis by Appex Club at PES University, focusing on technical aspects such as mentoring participants on app development, providing guidance on coding challenges, and evaluating innovative solutions.
- **Aatmatrisha PESU** PES University, Bangalore
EVM Core Member Dec 2023 - Present
 - **Annual Techno Cultural Fest:**
 - Organized and managed the annual mega hackathon providing guidance and insights to the students.

PROJECTS

- **Cropify:**
 - Developed a React-based web application that helps farmers optimize crop yield and diagnose plant diseases.
 - Utilized machine learning models, including CNN, Light GBM, and Decision Trees, to provide predictive insights from plant leaf images.
- **Plant Disease Prediction:**
 - Built a neural network in TensorFlow/Keras for plant disease detection from images.
 - Enhanced model accuracy by implementing convolutional neural networks (CNNs) alongside advanced techniques like data augmentation and dropout. These methods improved generalization and reduced overfitting.
- **Pharmacy Management System:**
 - Maintain and manage the records for a pharmaceutical store by improving efficiency, accuracy and security.
 - The system will help prevent waste of time and resources, allow easy access to medicines, as well as ensure more security.
- **To Do List Application:**
 - Developed a todo list application using the C programming Language with GTK 3.0 for the UI.
